I couldn't find any existing models that perfectly fitted my needs (collecting coins from 50 cents to 2 euros and were not too bulky), so I designed my own model.

Feel free to customize the dimensions (or anything else) to better suit your preferences :)

The Fusion360 file is provided for your convenience.

It is completely modeled from scratch, but the design inspiration is from [loetkolben82](#) with his [Euro Coin Collector](#).
